

Dental Nurse Network

NEW

Professional growth for Dental Nurses

Our mission

Dental Nurse Network (DNN) was set up to inspire and encourage dental nurses to develop their skills and further their careers. We are committed to providing ethical, affordable and flexible, high-quality education led by teachers who are experienced, passionate and qualified in their field.

Who we are

We are a team of dental care professionals – mostly dental nurses, dental therapists and dental hygienists – who work together to provide resources and training for dental nurses across the UK. We all value ethical education practices and are continuously updating our qualifications to ensure we are offering the best support, resources and services.

Opportunities

We create opportunities for nurses with additional qualifications to work with us and gain experience and extra income. We have a team of registered dental care professionals who write up-to-date, relevant content for us. They also teach, both online and in classroom settings, which allows them to gain valuable experience and enjoy generous rates of pay.

Our values

At DNN, we value ethical practices and excellence.

We provide excellent support services for all our courses and are constantly looking for ways to improve our support services and overall learning experience.

As a Henry Schein customer you will receive a **discount** off the advertised rate on all the following qualifications/courses:
