

Dentally

The future in practice

Today, cloud technology quietly features in many aspects of our everyday lives, supporting businesses to stay connected and streamlining their customer's journey as we all work together to return to pre-COVID levels of dentistry.

Providing an exceptional and safe patient experience means dental practices can build better patient relationships, so ensuring your team has everything they need to do so at their fingertips is essential.

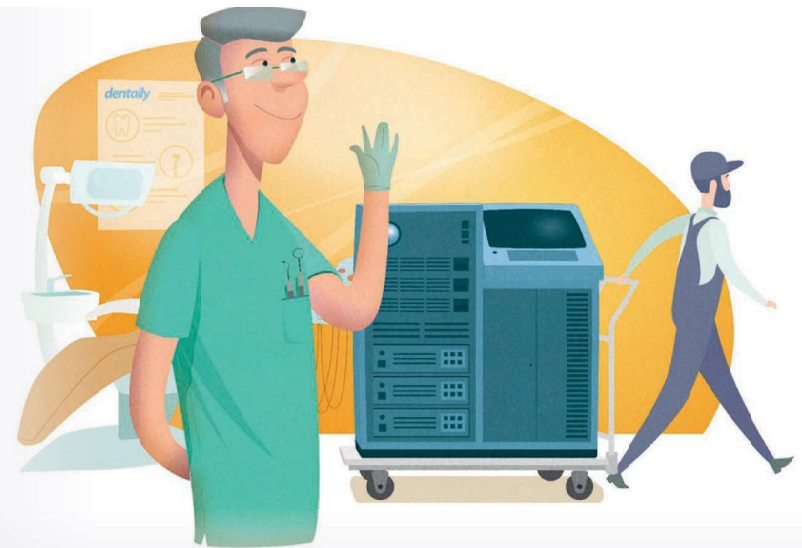

By using cloud-enabled dental software like Dentally, you have the digital tools to transform your business, whether you run a multi-site, NHS, private or mixed dental practice. You can streamline your processes, reduce your practice admin, deliver excellent patient care and manage your team. It is easy to use, very secure, helps you keep everything moving, stay in touch with patients and allows your team to work effectively to deliver the best possible care to your patients - whether they are on-site or working remotely.

Patient management is simple with Dentally, saving you time and resources by taking care of all your admin, tracking tasks, automating your patient communications, managing finances and all aspects of your day-to-day processes.

Why choose Dentally?

Dentally is all about ease of use - from practice admin to patient care or managing your team - our software aims to take the stress out of daily practice life.

- **Save money** - there is no need for expensive hardware and servers. All data is stored securely on the cloud to keep your practice running smoothly and cost-effectively.
- **Contactless reception** - including online medical history, self-check-in and payments - make things simple and safer for both your staff and your patients.
- **Save time** - manage your team and your practice admin seamlessly (whether staff are on-site or working remotely) with features such as task lists, automation and Dentally chat.

- **Stay connected** - keep patient communications open with Dentally, clear, concise and automated to keep your practice running smoothly.
- **Work from anywhere** - Dentally brings you flexibility and versatility. Our cloud-based software lets you work on-site or remotely - all you need is Google Chrome.
- **Easy onboarding** - simple to switch and easy to use - our onboarding team provides comprehensive training tailored to the skill levels of your team.
- **Powerful reporting** - Dentally sifts through your data quickly to produce real-time, easy to understand and analyse reports so you can make informed decisions with the most up-to-date data.
- **NHS contracts** - save valuable time with reduced admin and greater flexibility. Dentally for NHS practices is efficient, easy to use, with an effortless reporting process to manage your contracts.
- **Patient journey** - provide an effortless seamless patient journey from start to finish with tools such as Dentally Portal, our easy to use clinical record and treatment plans.

Dentally understands that running your dental practice is so much more than appointments, charting and finances. Our responsive support team is always available and ensures you get the best out of the software for your practice. We will support you now and in the future, develop loyal patient relationships with our effortless patient journey, manage your NHS and private work efficiently and save you valuable time - helping your practice get back to pre-COVID dentistry levels.
